

## HAPPY, HEALTHY, IMMUNIZED... AND REGISTERED WITH FLORIDA SHOTS.

Healthy children are happy children. That's why we use Florida SHOTS™ to track our patients' immunizations. SHOTS (State Health Online Tracking System) helps us ensure that your child's immunizations are up to date, prevents unnecessary duplicative immunization, and consolidates immunization records from multiple health care providers.

This secure, confidential Web-based system gives us one more tool to increase immunization levels across the state, and better immunization levels mean better health for your children and ours.

## FACTS YOUR OFFICE NEEDS TO KNOW ABOUT FLORIDA SHOTS<sup>TM</sup>

### **CONFIDENTIALITY AND HIPAA:**

Immunization records are confidential medical information. According to Florida Statute 456.057, health care providers involved in the care of a patient may share their records with the patients' other providers. Thus, information like immunization records may be shared between medical professionals without express written consent. Florida SHOTS is HIPAA-exempt.

The Office of Vital Statistics has already registered any child born on or after January 1, 2003, in Florida SHOTS (unless parents chose to opt out).

### **AUTHORIZED USERS:**

Florida SHOTS requires that providers be licensed in the state of Florida. Credentials are verified before registry access is granted. Information is password-protected and stored on a secure server.

### **MINIMUM SYSTEM SPECIFICATIONS TO USE FLORIDA SHOTS:**

#### **Operating System:**

Windows 2000 Operating System (or above), at least 128MB of RAM

#### **Internet Connection:**

Faster connections work best. However, dial-up connections can be used for access.

### **REQUIRED BROWSER SETTINGS:**

**Screen Resolution:** 800 x 600 (1024 x 768 if supported)

**Browser:** Microsoft Internet Explorer (Version MSIE 5.5 and above)

**Java Enabled:** Yes

**Cookies Enabled:** Yes
