

## Summary of Changes to Florida SHOTS Release 2017.3

Updates made prior to this release (completed since Release 2017.2 on 8/4/17):

- FLU QUAD 3Y+ PF vaccine type name changed to FLU QUAD PF. If administering traditional quadrivalent, preservative-free seasonal flu (Afluria, Fluarix, Flulaval, or Fluzone) but *not* the pediatric Fluzone quadrivalent product, then this is the type to use (or CVX150 via upload).
- FLU QUAD 6-35 PF vaccine type name changed to FLUZONE QUAD PED PF to more specifically identify the narrow purpose of the vaccine type (CVX 161 via upload).
- ‘Out of Commission’ added as temperature excursion reason for sites to use in cases of refrigeration failure such as due to natural disasters.
- FLUCELVAX QUAD P availability date corrected to 7/7/17

New updates affecting all (or most) users:

- Assessment file list updated such that “Created By” column now will also include the organization name if the user who created the file is not from the organization of the logged in user. This will more clearly identify assessments run by state immunization staff versus those done locally.

Create Assessment File List			
Status	Assessment Date	Created By	For Patients

Click on a row above to select an assessment file.

[Create New File](#) [Next Page](#)

- Mother and father SSN values will now be accepted via HL7 uploads and web services. Data will still be masked.
- Adverse event info now appears (via purple pop-up) on the Vaccination List page when hovering over the new blue info icon in the “Total Mos/Adv Event?”

column of the vaccination list or in the Adverse Events list itself (when an adverse event is present).

- Message received when offered the chance to become the “Current Immunization Provider” (CIP) has been updated to be more clear what the ‘OK’ and “Cancel” buttons actually do. Both options will still cause the record to be saved. Clicking “Cancel” simply means that you do not wish to become the CIP.

- Vaccination List page design changes:
  - ‘View’, ‘Change’, and ‘Provider Contact Info’ buttons will be removed
  - Bold/underline effect when clicking on a row to select it will be removed, as well as the selection mechanic
  - Instead of the above, if the active user has the ability to edit a vaccination, then clicking on it in the list will bring up the Change Vaccination Record page. If not (it was provided by another org or you are a view-only user or in a view-only org), it will be brought up via the View Vaccination Record page. Provider contact information links will remain on the view/change

record page as they are currently but there is no need for the button to view this information on the list page itself.

Vaccine	Type	Effective Date	10/30	11/01	12	Provider	Check
VZV	MMRV	01/01/2003	1	1-0	12	PEDIATRIC ASSOCIATES PA LL	<input type="checkbox"/>
			0	365	N		
VZV	MMRV	01/01/2006	2	4-0	48	PEDIATRIC ASSOCIATES PA LL	<input type="checkbox"/>
			1096	1461	N		

- Gender removed from patient search
- Vaccine Utilization report updated to remove SSN column and add column for vaccine expiration date, which helps when looking for inventory errors needing correction.
- Meaningful Use Stage 3 “Registration of Intent” and enrollments
- Form 687s are now delivered in .pdf format
- New “Special Conditions” indicator added to add/change vaccination page in order to document vaccinations administered for special reasons, such as for hurricane evacuee relief efforts.

### Add Vaccination Record

**Vaccine Type:** \*  [Vaccine Type Information](#)  
**Injection Site:**   
**Provider Org ID:** \*   
**Imm Service Site:** \*   
**Funding Program:**   
**Manufacturer:**   Include inactive  
**Lot Number:**

**Special Conditions: 1**  
 Select the item(s), if any, that are applicable to this vaccination.

Add another vaccination record after "Next" button is clicked  
 \* Asterisk indicates a required field

New updates affecting users who participate in vaccine ordering programs (VFC, etc.):

- New “Shots Recorded” information now shown in Order Requests and Transaction History areas of the system (Transaction History update is only new for private providers; CHDs already reduce inventory counts with each

vaccination recorded). This information is based on vaccinations recorded (interactively or via upload) and associated with mfg/lot/exp date/funding program. This information is presented to assist with keeping inventory information accurate as it pertains to vaccine ordering and accountability.

- Order request inventory levels page (for all users) updated with new “Shots Recorded” column.
  - Vaccination records which don’t match to known received inventory will also appear with shots recorded counts. The total shots recorded count for each vaccine category will also function as a link that will open a separate page which will detail all associated recorded vaccinations (Note: If the order request is complete and additional vaccinations are recorded for the period, it will not be reflected on the order request page but it will be shown on the associated vaccination records page via the link).

Order Request – Doses Administered and Inventory Levels example (private provider version; CHD version automatically fills in doses administered based on inventory reduced with each vaccination recorded):

Vaccine Category: Tdap											
Brand Name	Packaging \$ per dose	Lot #	ExpDate	Begin Inv	Rcvd + Xfer In	Doses Admin	Shots Recorded	Xfer Out	Adjust ments/ Returns	Calc Inv On-Hand	Current Inv
Boostrix 58160-0842-52	10 Single Dose Syringes \$ 31.3700	G95PP	08/09/2019	0	70		0			70	
		594SR	07/08/2019	20			0			20	
		ZN937	07/05/2019	80			1			79	
		3K799	05/18/2019	30			0			30	
		X994C	05/18/2019	33			0			33	
<b>Total for all 58160-0842-52 lots:</b>				163	70	0	1		232	0
